The use of irreversible electroporation  
(IRE) for cancer treatment has increased  
sharply over the past decade. As a  
nonthermal therapy, IRE offers several  
potential benefits over other focal  
therapies, which include 1) short  
treatment delivery time, 2) reduced  
collateral thermal injury, and 3) the  
ability to treat tumors adjacent to major  
blood vessels. These advantages have  
stimulated ...
