Radar sets use the echo to determine the direction and distance of the reflecting object. The term RADAR is an acronym made up of the words: RADio (Aim)* (Aim) Detecting And Ranging. The term "RADAR" was officially coined as an acronym by U.S. Navy Lieutenant Commander Samuel M. Tucker and F. R. Furth in November 1940.

Radar Principle - Radartutorial
I have not followed along to the entire book, but I did read the first 2 chapters and feel that I got out of it what was intended. The book is also very transparent as to what it is not : This book serves as an introduction to the tidy text mining framework along with a collection of examples, but it is far from a complete exploration of natural language processing.
