An inboard engine is basically an engine that is inside the boat. Whereas an outboard has the engine on the outside of the boat, attached to the transom of the boat. (We'll talk about that in detail in a little bit.) Whether it be an inboard or an outboard, there are a couple of different components that make up the engine system of a boat.

Inboard Vs. Outboard Motor: What's Right For You?

Inboard-outboard boats (I/O) use engines housed in the rear of the boat under a cowling. The propeller and prop shaft is attached to a power trim that raises and lowers this part of the engine. If the power trim malfunctions, the shaft and propeller must be raised manually. It helps to have one or two assistants with ...

Power Tilt & Trim Systems | iBoats

What fluid is commonly used in OMC Cobra power trims? Do I need to stick to the OMC brand or can I use something else? Mine is a little low because when I trim all the way up, I loose hydraulic suction(the motor goes fine). If I don't go all the way up, it works fine. I don't think any fluid was ever added to this 21 year old boat.
