Manual Focus (MF): The user sets the focus manually by turning the ring. Direct Manual Focus (DMF) : The user manually overrides the distance set by autofocus (or vice versa) The Sony RX100 M1 allows you to lock focus, albeit there is no direct function for this, and also, with some "trickery," to store fixed distances for later use:

**Sony RX100 M1: Manual Focusing and Focusing Support**  
Once in manual mode the camera will not zoom in for the photo any more. It will only zoom in so you can see your focus point, and then it will reset to your set focal distance. Once the camera zooms in so you can get a better look at what you're focusing on you're able to manually turn the focus ring to dial in your focus.
